

# *Infrastructure Development Consultants*

---

**Bridging Vision with Reality :  
Innovating Infrastructure, Empowering Communities.**

## **About IDC:**

"A vision backed with invaluable experience and years of commitment towards the betterment of society manifested itself in the genesis of a humble beginning called "Infrastructure Development Consultants (IDC)". IDC's journey began in March 2002 when a team of young dynamic professionals came together to break out and make a new start. They meticulously brainstormed to chart out the path for this multi-disciplinary consulting organization. In their daily dealings with professionals in their respective fields, they were always faced with lack of a consulting organization which brings diverse services one roof under along with making a promise of delivering highest standards of quality. IDC was conceptualized with an aim to fill this gap. IDC is yet another example of showing that there is always a room for improving the present set up and strives for perfection. A long journey has begun..."

## **IDC VISION :**

"We aspire to be the leading Infrastructure Planning, Engineering, Social and Environment Consultants in this region by providing high value added, high quality, cutting edge services to our clients, through our wide pool of experts, thus helping create value for the society."

## **Reaching for the stars...Together!**

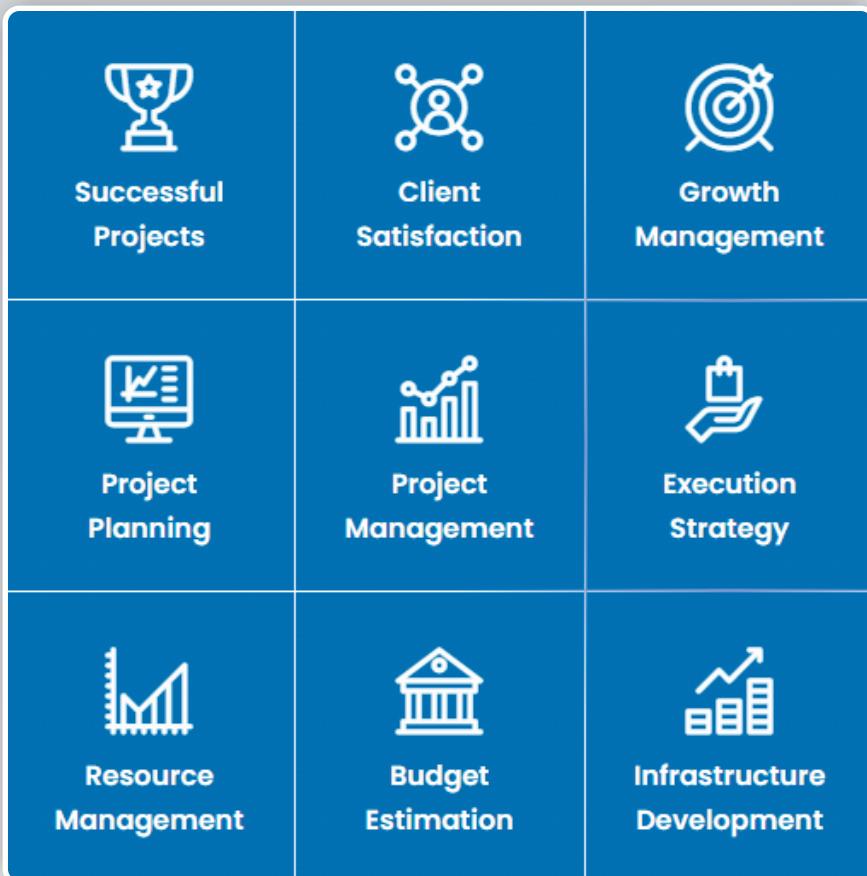

## **IDC MISSION :**

We, at IDC, An ISO 9001:2015 Certified Company, pledge to serve all our clients by consistently delivering superior value with the highest quality and confidentiality standards and by taking a truly global approach. We constantly strive to upgrade our knowledge pool and try to attract the best professionals to join hands with us as consultants. We together create an exciting and caring environment full of growth opportunities for all those who have the fire in their belly to try and be different. Most importantly, we govern ourselves through a set of strong values emphasizing integrity, teamwork and meritocracy. Our endeavour is to contribute actively to the society and its development.
